Water Recycling & Stormwater Management

Products and Systems for
domestic homes, residential and commercial,
new construction and retrofit

Stormwater Management

Subsurface solutions with DRAINMAX tunnel

- Infiltration and attenuation of stormwater
- Infiltration of effluent from small sewage treatment plants
- Rainwater storage
- Firewater storage
- Subsurface irrigation

Handle your project with an easy to ship and install subsurface system.

- ✓ DIBt® approval
- ✓ Loadable up to SLW60
- ✓ Best price per m³
- ✓ Quick laying

Water Reuse

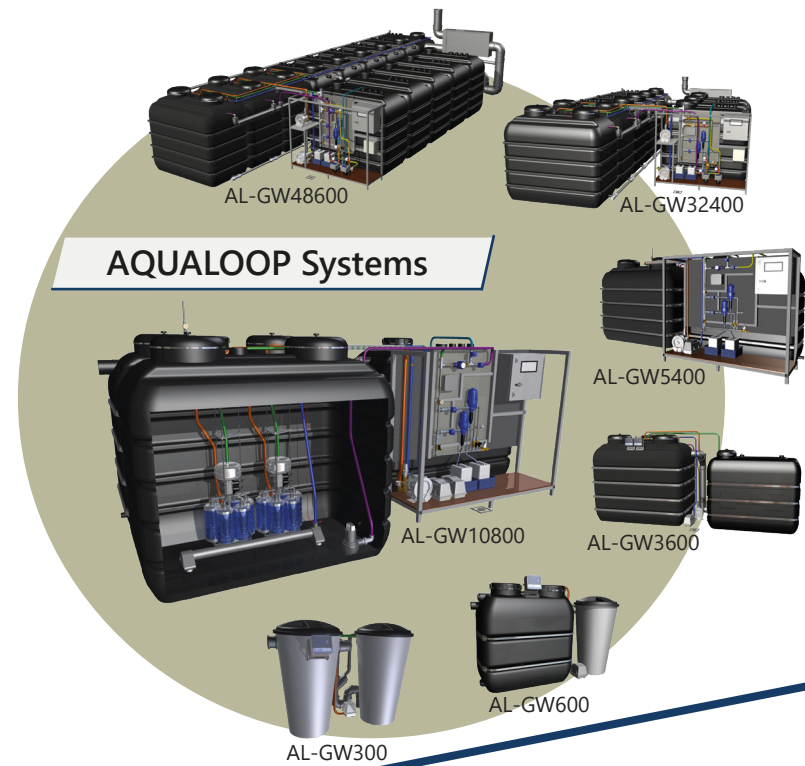

Pre-assembled AQUALOOP systems

- AQUALOOP Greywater recycling
- AQUALOOP Potable water production
- AQUALOOP Adiabatic cooling
- AQUALOOP Reuse of waste water from sewage treatment plants

Save more than 50 % water in new construction and renovation.

- ✓ Ready to connect technology
- ✓ Treatment capacity from 300 to 83,000 l/day
- ✓ Certified safety by NSF & BS*
- ✓ Fast amortization possible in 6 years
- ✓ Low space requirement

* for Greywater recycling systems

I-CONNECT Monitoring

Easy operation for all stormwater management and water reuse systems.

- Control and operate the system from everywhere
- Read consumption and statistics
- Optimize system parameters
- Be informed about maintenance requirements
- Integration into local BMS
