

Use rain- and greywater as your own water sources!

# House- water sources

- ▶ No more limescale in your house due to rainwater
- ▶ Healthy thanks to rainwater
- ▶ Up to 100% self-sufficient water system

WATER, WE'RE IN OUR ELEMENT

INTEΨA

Your house already contains several, up till now often unused water sources. Those water sources for example are:

1. Rainwater – gifts from heaven
2. Greywater – your own shower and bath water

## RAIN - water source

In many areas there is rainwater of sufficient quality available to cover almost the entire demand for water.

### Showers - drinking - washing - garden

### Unbeatable arguments

- Save money with calcium free rainwater
- No annoying limescale deposits on fixtures, less cleaning effort
- Saving laundry detergent
- Less shower gel and beautiful hair
- More independence from the drinking water supply
- No need to buy bottles of drinking water
- Simple retrofitting
- The Federal Environment Ministry recommends rainwater to water plants

- Animals love limescale-free water
- Tea and coffee taste better with soft water
- No anthropogenic trace material and medicine residues
- Healthy skin with soft rainwater
- Rainwater which is limestone free increases the life expectancy of warm water systems

AQUALOOP - the installation kit for water treatment produces clean, germ-free water. Depending on the demand, you can combine your house water sources to become completely independent with your water supply.

## GREY - water source

The first customers who tested the AQUALOOP shower water recycling systems did not initially report on water savings achieved. They simply said, that both they and their children now really preferred taking showers.

**„From now on showering can be twice the fun“**

„It is a great feeling knowing that the water we are using will be reused again in our own house.“

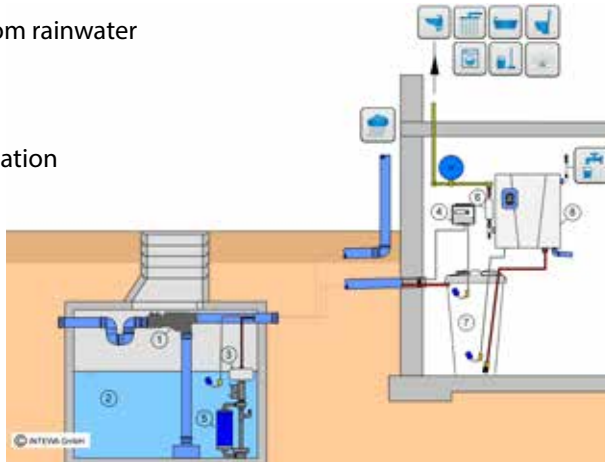

In grey water recycling, the less contaminated water from shower, bath tub, hand basin and washing machine is collected and processed for reuse in toilet flushing, garden watering and household cleaning purposes.

# APPLICATION WITH SYSTEM

Example: drinking water from rainwater

- 1 PURAIN filter
- 2 Rainwater tank
- 3 AQUALOOP membrane station
- 4 AQUALOOP controller
- 5 AQUALOOP membrane
- 6 RAINMASTER
- 7 Clear water tank
